POLLINUS®
HONEYBEE ATTRACTANT

MODE OF ACTION
Pollinus is an attractant for pollinating insects (honeybees), which concentrates and increases its activity at different times.
Pollinus is composed of extracts of allelochemicals with a high affinity to achieve the objective of attracting honeybees therefore increasing the potential for pollination.
The action of pollen gathering is triggered by the integration of a host of visual, olfactory and gustatory stimuli. The pollen gathering bees are governed on one hand by dances and on the other hand by scents or trace pheromones produced or conveyed by the exploring bees.
Pollinus reproduces as exactly as possible these scents, thus attracting the exploring bees but more importantly the pollen-gathering bees that could otherwise be attracted by other crops with more attractive nectar.

DIRECTIONS FOR USE
Shake well before use.

Crop	Rate
Horticulture: Tomato, Capsicum, Cucurbits, Berries	1 L/ha
Fruit Trees: Apple, Pear, Cherry, Stone Fruit	
Nut Trees: Almond, Macadamia & Walnut	
Greenhouse Crops	0.6 L/ha

GENERAL INSTRUCTIONS
Pollinus is applied with sprayers or atomizers during the flowering period with a minimum water volume of 600 L/ha in fruit trees and 400 L/ha in field horticulture. In general, the application of Pollinus on the day of introduction of pollinating hives is recommended. This increases activity in the crops in question and the rate of fruit set.
At least two applications are recommended:
1. the day of introduction of the hives into the crop (normally at the beginning of flowering: 10% of open flowers).
2. in full bloom (90% of open flowers).

In the greenhouse carry out 2 applications at 7-10 day intervals. If the crops have a long flowering period, a third treatment can be carried out.

Apply Pollinus in the early morning when weather conditions are favourable.

SAFETY DIRECTIONS
Keep out of reach of children. Read carefully and follow all instructions. Avoid breathing dust, fumes, gas, mist, vapours or spray. Wash hands, face and all exposed skin with soap and water thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. Wear protective gloves/protective clothing including eye/face protection and suitable respirator.

STORAGE AND DISPOSAL
Store in a cool, dry, well-ventilated place and out of direct sunlight. Store away from foodstuffs. Store away from elevated temperatures/sources of heat, sources of ignition and oxidising agents. Keep container standing upright. Keep containers closed when not in use.
Plastic containers: Triple-rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.
If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.
DrumMUSTER containers: This container can be recycled if it is clean, dry, free of visible residues and has the drumMUSTER logo visible. Triple-rinse container for disposal. Dispose of rinsate by adding it to the spray tank. Do not dispose of undiluted chemical on site. Wash outside of the container and the cap. Store cleaned container in a sheltered place with cap removed. It will then be acceptable for recycling at any drumMUSTER collection or similar container management program site. The cap should not be replaced, but may be taken separately.

FIRST AID
If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor. If on skin, immediately wash area with soap and water. If skin irritation or rash occurs, seek medical advice. If poisoning occurs, contact a doctor or Poisons Information Centre. *Phone Australia 131 126, New Zealand 0800 764 766*.

SAFETY DATA SHEET
Additional information is listed in the Safety Data Sheet that can be obtained from the supplier.

CONDITIONS OF SALES
UPL warrants that the product within the unopened container conforms to the chemical description on this label. The directions on this label must be followed carefully and are based on tests, believed to be reliable. As the occurrence of unusual weather or soil conditions, and the use of this product, are beyond the control of the manufacturer, no guarantee, expressed or implied, is made as to the effects of such use or the results obtained, and in no event, shall the liability of UPL exceed the price of the product used. The purchaser must assume all risks of storage, use or application of this product. Goods are sold subject to the standard Conditions of Sale of the manufacturer, available on request. Use of the product implies that the purchaser accepts these Conditions of Use.

Additional statements required by Globally Harmonised System for classification and labelling of chemicals (GHS) and Safe Work Australia:
Causes skin irritation. May cause an allergic skin reaction. Causes serious eye damage.
